Ordering Details

Product Code	Vessel Diameter (")	Vessel Length (")
PV-PK	7	17
	8	17, 35
PV-PK	—	
e.g. PV-PK-835		

Volume	4.7L	5.6L	17.8L
Packaging	07 x 17"	08 x 17"	08 x 35"
	6 at 18kg	6 at 24kg	6 at 36kg

Features & Information

- The integrated top and bottom plate distribution system of the Premier pressure vessel range eliminates the likelihood of dead zones and reduces the potential of channelling, enabling the media to be used to its full potential. The Premier pressure vessel range can achieve 30% higher resin yields, resulting in savings on resin and servicing costs
- Constructed from 100% injection moulded, thermally welded polypropylene materials these vessels offer far superior strength and durability to alternative composite tanks
- Vessels come complete with Premier head, adaptors, locking clips, O-rings and integrated distribution system

Integrated top and bottom distribution plates to allow 100% of the resin to be used
